Monitoring Progress of THE PEP

12th Session of THE PEP Steering Committee
Geneva, 19 November 2014
Options on indicators and reporting

a. Continue with the annual questionnaire (short or long term)

b. MS to provide evidence (links to relevant supportive documentation e.g. publications, reports of events, national policies/legislation) for the annual questionnaire. Costs: 3–4 days to collect the documentation and 1 m for the secretariat for the analysis and validation.

c. Development of an indicator-based assessment of progress in the achievement of THE PEP goals at the national/pan European level, in collaboration with relevant institutions (EEA), considering the reporting burden of the MS, using indicators and tools that could be applied for monitoring progress in the integration of transport, health and environment policies. Costs: establishment and maintenance of the reporting framework. The Steering Committee could request the Secretariat to develop a proposal for such a monitoring framework, including estimated costs, for consideration by the 13th meeting of the Steering Committee.
