Questionnaire for reporting on progress made on the attainment of the Paris Goals

Following the Fourth High-level Meeting on Transport, Health and Environment (4HLM) in Paris on 14-16 April 2014, THE PEP continued to conduct its yearly surveying of Member States on the developments in achieving the goals of the Paris Declaration since 2014. These replies were used for a regional overview on progress made at the 12th Session of the Steering Committee of THE PEP in November 2014.

The answers below were submitted by the listed THE PEP focal point(s) to THE PEP secretariat in fall 2014 and are provided here in an unedited version.
Section A: Information about the preparation of the replies to the questionnaire

Country: The former Yugoslav Republic of Macedonia
Date: 29/10/2014

Name of officer (national focal point) responsible for submitting the report: Mihail Kochubovski

Institution: Institute of Public Health of the Republic of Macedonia
Postal address: 50 Divizija No.6, 1000 Skopje, Republic of Macedonia
Telephone:  
Fax:  
E-mail address:  
Website: http://iph.mk

Names of the officers (national focal points) from the other two sectors that participated in the preparation of the report

1. Kosta Trajkovski
2. Marin Delivanov

Institutions:
1. Ministry of Environment and Physical Planning
2. Ministry of Transport and Communications

E-mail addresses:

Websites:

Please provide brief information on the process through which this report has been prepared, including information on which types of authorities were consulted or contributed to its preparation.

- Ministry in charge of health
- Ministry in charge of environment
- Ministry in charge of transport
- Regional authorities
- Local authorities
- Academia
- Private business
- Non-governmental organizations
- Others, please specify:  

Please report any particular circumstances that have a major impact on the context for the implementation of THE PEP in your country. For example, whether the decision-making structure is federal and/or decentralized and whether financial constraints are a significant obstacle to implementation.

Decision-making structure is centralized and there are some constraints to implement THE PEP. But, through actual, modern politics for decentralization and strategies named to develop an efficient and safe transport, there are many activities related to it, on local level.

Please continue with Section B.
Section B: Implementation of the Paris Goals

Priority Goal 1: to contribute to sustainable economic development and stimulate job creation through investment in environment- and health-friendly transport

indicator 1.1 Please describe any policies or programmes in your country that support investment in the following:

Development of transport infrastructure that promotes safety, environment and health and has a job creation potential, including rail and light rail. Please specify:

- Law on Construction ("Official Gazette of R.M.", no. 70/13)
- Law on Spatial and Urban Planning ("Official Gazette of R.M.", no. 70/13)
- Law on Construction Land ("Official Gazette of R.M.", no. 59/13)

Clean and efficient intermodal connections. Please specify:

- Preparation of Study for Intermodal Connections in the Republic of Macedonia under IPA funds

Safety measures in road transport. Please specify:

- Law on Public Roads ("Official Gazette of R.M.", no. 84/08)
- Law on Safety on Road Traffic ("Official Gazette of R.M.", no. 84/08). Draft Law on changes on Law on Safety on Road Traffic has been drafted, but it is still not adopted by the Parliament. In summer 2014 the Government has started a new Public Campaign "Respect the rules, respect life" and it will continue of this year (not to drink alcohol, safety belt, youth and traffic not to use alcohol and drugs and not to speak on the mobile phones, slow driving).

Infrastructure for active and environmentally friendly transport. Please specify:

- Law on Public Roads ("Official Gazette of R.M.", no. 84/08)
- Law on Railway System ("Official Gazette of R.M.", no. 91/13)
- Law on Air Transport ("Official Gazette of R.M.", no. 68/13) There are a 300 new public buses with Euro 5 in Skopje introduced since 2013. There are a new public buses with open roofs for sightseeing in Skopje and Ohrid paid by the Government. As well for turists in Skopje, Ohrid, Struga and other places there are bikes for renting in the cities, as well in the hotels. There are 20 small electric cars and 20 electrical bycicles on the city of Skopje.

Eco-Tourism. Please specify:

Eco-Tourism is strengthening with new lanes for mount-biking and walking in all National Parks (3) and protected areas near to the main cities. From day to day there are more and more users to this kind of eco-turism and these users are organized in Civil Societies through them promoting their activities.

Priority Goal 2: to manage sustainable mobility and promote a more efficient transport system

indicator 2.1 Describe the 3 main policies or programmes in your country that support mobility management and modal shift away from the private car toward more environmentally-friendly modes (public transport, walking and cycling, etc.) and indicate the level (i.e. national, sub-national, local/municipal) and target groups

<table>
<thead>
<tr>
<th>Level</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>national</td>
<td>Introduction of 300 new buses for the public fleet in Skopje, the Capital of the country. These buses fulfill the Euro 4 and 5 standards. This year are introduce new 20 electric cars in Skopje and 20 electric bikes for using of citizens and turists. In the implementation phase is a process of reconstruction of railways and purchasing of new trains for passengers and goods with fulfilling of new standards for eco-friendly traffic.</td>
</tr>
<tr>
<td>communities</td>
<td></td>
</tr>
</tbody>
</table>
indicator 2.2 Does the government raise awareness of mobility choices?  
Yes

indicator 2.3 Does the government promote the use of information technology to increase the efficiency of the transport system?  
Yes

indicator 2.4 Are there mechanisms in place in your country to improve the coordination between land use and transport planning?  
Yes

indicator 2.5 Does your country take any measures to promote high-quality integrated public transport and reducing the need for, and the volume of, car traffic?  
Yes  Please specify: Introducing Public bus transport, free bus transport when the air quality is bed, electric mobility for ministries (motor-bikes) etc.

Priority Goal 3: to reduce emissions of transport-related greenhouse gases, air pollutants and noise

indicator 3.1 Describe any strategies, policies or measures to support a shift in the vehicle fleet towards zero- or low-emission vehicles and fuels based on renewable energy, clean transport modes and fostering electric mobility as well as eco-driving.  
In Skopje the process of replacing of old-fashioned buses in public traffic supported by the government has been finished. Public buses have been replaced by new ones that fulfill the standards of low-emission vehicles. Private buses are in the process of renewal by the owners, with new fleet of buses that fulfill the standards of low-emission vehicles. Also, there is a process of upgrading the old buses with buses run by natural gas. In Skopje has been prepared a feasibility study for a Tram.

indicator 3.2 Does your Government take any measures to support a reduction in noise emissions from transport activities?
Priority Goal 4: to promote policies and actions conducive to healthy and safe modes of transport

indicator 4.1 Describe any strategies, policies and measures in your country for the promotion of healthy and safe modes of transport, including infrastructure and safety measures for safe walking and cycling, policies to support cycling and walking, in particular in urban areas and links with efficient and accessible public transport

Trough actual strategies, policies and measures, in all, the larger towns of RM, there are many projects and activities to develop safety transport, by building of modern streets and underground ways, to separate motor and pedestrian moving. On the collector streets, traffic are regulating and controlling by computer center (many lights with ,,grin wave,,), with intents to make it efficiently and safe (low release pollution: gases and noise), specially for pedestrians and bicycles. Also, in main centers of the towns we established pedestrian zones, without motor transport. There is many bicycles roads, with public renting bicycles, connected with all bicycles ways witch are going to the living areas out of the city centers. Governement gives opportunity for youth and retired people to use trains free of charge during several days of months, especially during the weekends.

indicator 4.2 Do transport policies and actions in your country focus on vulnerable groups such as children and persons with reduced mobility?

Yes ▼ Specify: In new public busses there are lifts for persons with reduced mobility. Pavements are constructed in the way to allow the access to persons with reduced mobility. The same is valid for all public facilities.

Priority Goal 5: to integrate transport, health and environmental objectives into urban and spatial planning policies

indicator 5.1 In your country, at what administrative level(s) is spatial/urban planning regulated?

- national
- sub-national
- local / municipal

Specify authorities: Ministry of Transport and communications, as well Ministry of Environment and Physical Planning.

indicator 5.2 Is spatial planning coordinated between the authorities indicated above in indicator 5.1?

Yes ▼

indicator 5.3 Describe any policies or legal measures that require integrated urban and spatial/urban planning in order to reduce the impact of transport on health, the environment and land use, increase energy efficiency and support green and healthy mobility and transport as well as sustainable livelihoods. Please also indicate at which administrative level they exist.

There is a Governmental Committee on Health and Environment that is promoting green and healthy mobility through modernizing of the transport infrastructure at all levels.

indicator 5.4 Are there national capacity building initiatives on integrating transport, health and environmental objectives into urban and spatial planning policies?

Yes ▼

If YES, please indicate how they are done?

- academic education
- training for professionals
Please continue with Section C.

### 7. Policy, regulatory and operational frameworks that support the promotion of THE PEP

#### indicator 7.1 Do you have a coordinating body and/or a formal structure for implementation of THE PEP within your government?

No ▼

Represented sectors:
- Transport □
- Environment □
- Health □
- Finance □
- Academia □
- Education □
- Spatial/urban planning □
- Agriculture □
- Others, please specify: □

#### indicator 7.2 Is integration of the three sectors reflected in any other national policy document(s)?

Yes ▼

Please list main documents: NEAP I, and II, NEHAP, Strategy for sustainable development, Law for Environment (SEA, EIA), Law on Ambient Air Quality, Noise Protection Law, General Urban Land Plans etc.

#### indicator 7.3 Is public awareness in relation to the integration of the three sectors addressed in relevant national document(s)?

Yes ▼

Please list main documents: Under local and national activities, projects and public campaigns.

#### indicator 7.4 Are public budgets and/or economic incentives available specifically to support integration of the three sectors?

No ▼

Please specify:

#### indicator 7.5 Are there any national policies or legal measures that require public consultation and stakeholder involvement in decision making processes in the field of transport, health and environment?

Yes ▼

#### indicator 7.6 Does your country have a national action plan for the promotion of cycling?

No ▼

### 8. Future of THE PEP

#### Indicator 8.1 What have been the main successes of THE PEP in stimulating national action in the priority areas of THE PEP in your country? Please give concrete examples and a short explanation of your assessment.

Public awareness has been raised and established activities for promoting of use bicycles, public transport and walking. The number of passengers in public buses is increasing. Modern system of charging of tickets and monitoring of traffic flow for the public transport is in process of implementation in Skopje. Strategy for traffic safety has been endorsed.

#### Indicator 8.2 What have been the main weaknesses of THE PEP in stimulating national action in the priority areas in your country? Please give concrete examples and a short explanation of your assessment.
